Button Panel Measuring Instructions

- Be sure to provide all the information required in the legend at the bottom of each template before returning it to Door Guard.
- Using a digital camera provide an upper and lower photograph of all elevator cab button panels. Be sure the photos are framed to overlap the center section the panels. We would like to see the entire vertical dimension of each button panel to ensure accurate customization of the Cab Liner.
- If you submit templates for more than one elevator be sure to identify which photos match with each template. Use the building address, floor number and elevator location found in the template legend to accompanying photos.

- Mail all printed photographs to:
Door Guard LLC 826 Ponderosa Drive Imperial, PA. 15126

Or send JPEG files to: doorguard@worldnet.att.net
Be sure to note in your e-mail the address of the corresponding building of the accompanying template so we may match the photo to the correct building.

Fax all measuring templates to 724.695.8937 or mail to :
Door Guard LLC 826 Ponderosa Drive Imperial, PA 15126

We strongly urge the person providing the measurements to Door Guard to call and confer with our staff prior to taking any measurements. It is also helpful for the person taking the measurements to see a copy of our product brochure to better understand the purpose of the measurements he or she is providing. Photos of our products can be seen on our website www.doorguardllc.com on the "Products" page. Please call us at 724.695.8936 or e-mail us at doorguard@worldnet.att.net if you have any questions.
